WHAT I BRING

Audio Lead with 10+ years delivering production-ready interactive audio for mobile games and feature films. Full ownership of VO pipelines — casting, directing, recording, editing, and in-game implementation. FMOD Studio across multiple shipped titles; Wwise-proficient with event graphs, RTPC systems, state machines, and spatialisation architecture directly transferable from FMOD. Designs adaptive and interactive music systems, authors audio mood boards and feature documentation, and manages outsourced vendors end-to-end. Collaborates natively with engineers — defining integration contracts, parameter schemas, and bus architecture as standard practice. Establishes audio pipelines from scratch and delivers at any scale without oversight.

KEY PROJECTS

SpongeBob: Krusty Cook-Off

Nukebox Studios · Mobile · 100M+ downloads · Google Play Users' Choice 2020

Role: Sole Audio Lead — full pipeline ownership

Served as sole audio decision-maker on the studio's flagship title — designing all SFX, directing outsourced voice talent, and implementing adaptive music systems in FMOD Studio directly integrated with Unity.

- Owned the complete VO pipeline: casting briefs, remote session direction, edit and in-engine implementation across character and gameplay states.
- Authored audio mood boards and feature documentation for every content update; co-defined event naming schemas and bus architecture adopted by engineering.
- Managed all audio outsource relationships — vendors, voice talent, and session facilities.

Beat Kingdom (In Development)

Original Rhythm IP · Independent · Aug 2025 — Present

Role: Audio Lead & Audio Director

Leading full audio direction on an original rhythm IP — designing adaptive music systems driven by BPM, intensity, and player input. Architecting FMOD Studio integration end-to-end.

- Authored audio mood boards and feature documentation from the ground up; defining event graph structure, RTPC parameter contracts, and state machine architecture.
- Building interactive music system with seamless layer transitions tied to real-time gameplay parameters.

Cinemabandi

Netflix India · 2021 · #1 Trending Debut Week · IFFI Jury Special Mention · 7.8 IMDb

Role: Audio Director, Sound Designer & Composer

Defined the film's complete sonic identity — sound design, original score, ADR direction, foley, and final mix — working directly with the director and post team.

- Directed all voice talent and ADR sessions; supervised foley and sync sound across principal photography.
- Composed and produced the original score; sole audio producer from pre-production through final deliverable.

Angry Birds Match 3 (now Angry Birds Hatchlings)

Gear Inc. / Rovio · Mobile · 10M+ downloads

Role: Sound Designer — SFX & Adaptive Music

Designed SFX and adaptive music system for Rovio's Match 3 title at Gear Inc. Delivered complete audio asset suite — UI, gameplay, and ambient layers — integrated via FMOD Studio with parameter-driven intensity scaling.

- Worked within an established audio pipeline at a mid-size studio; collaborated with engineering on parameter contracts and state machine transitions.
- Delivered audio for M&M's Adventure (500K+ installs) on the same contract cycle.

Middleware: FMOD Studio (shipped, extensive depth) · Wwise (proficient) · Unity Audio

Audio Direction: VO pipeline · outsource management · audio mood boards · feature documentation

Game Audio: Adaptive / interactive music · SFX design · spatial audio · parameter systems

DAW / Post: Logic Pro · Pro Tools · Reaper · ADR · Foley · Mixing & Mastering
