

SIRISH SATYAVOLU

Speech & Voice Subject-Matter Expert — Audio Evaluation & Annotation

Austin, TX | 512-947-4428 | sirishsatyavolu@gmail.com | linkedin.com/in/sirishsatyavolu

PROFESSIONAL SUMMARY

Audio professional with 10+ years of trained critical listening across speech, music, and interactive media. Professionally developed ear for speech aesthetics — pitch, inflection, intentionality, and audio fidelity — with hands-on work in phonetic segmentation, IPA mapping, and AI-assisted speech evaluation. Skilled at evaluating subtle differences in emotion, intent, and audio quality, writing annotation guidelines, and grading data quality.

CORE COMPETENCIES

Critical Listening: Discriminative listening, sample-rate fidelity (24kHz vs 48kHz), transients, noise floor, sibilance

Speech Aesthetics: Emotion, intent, prosody, naturalness; scripted vs. spontaneous delivery

Phonetics: IPA mapping, segmentation, alignment, speech annotation

Annotation & QA: Annotation guidelines, quality grading, vendor QA, calibration, data labeling

Evaluation: Defining quality criteria, expert audio judgment, actionable feedback

Tools: Pro Tools, Logic Pro, FMOD; mixing & mastering

PROFESSIONAL EXPERIENCE

Speech Data & Phonetics Researcher — *Confidential Client (Remote)*

Feb 2026 – Present

- Building a structured, IPA-mapped phonetic dataset with articulation features for an API-ready speech and pronunciation platform.
- Defining labeling conventions and quality criteria so speech data is annotated consistently and remains reliable across contributors.

AI Speech Evaluation Developer — *Confidential Client (Remote)*

Nov 2025 – Present

- Prototyping AI-assisted speech evaluation — solving phonetic segmentation and alignment so the system grades spoken audio against a reference standard.
- Translating expert listening judgments into consistent, reusable evaluation rules — defining what counts as correct, near-correct, or incorrect.

Founder & Lead Audio Designer — *Beat Kingdom, Original Rhythm IP*

Aug 2025 – Present

- Designing a music system driven by real-time audio analysis, applying close listening to pitch, timing, and intensity to evaluate and tune output quality.

Sound Designer, Composer & Audio Director — *Independent Film Projects*

Jan 2019 – Present

- Directed voice talent, ADR, sync sound, and dubbing across four Telugu features — Cinemabandi (award-winning), Anthele Kadha Anthele, Kavyam, Seetharam Sithralu — judging delivery for emotion, intent, intelligibility, and naturalness.
- Delivered full mixing and mastering across drama, comedy, and horror, holding a high-fidelity standard for noise floor and tonal balance.

Lead Audio Designer — Mobile Games — *Nukebox, Giga Fun, Qila Games, Gear Inc.*

Oct 2018 – Sep 2025

- Shipped audio across 9+ titles reaching 200M+ players globally — including Spongebob: Krusty Cook-Off (29M+ downloads, Google Play Users' Choice Award 2020), Angry Birds Match 3, and M&M's Adventure.
- Owned full audio pipelines — composition, SFX, mixing, and middleware integration — and built consistent QA standards and review criteria for asset quality across match-3, puzzle, and casual genres.
- Documented clear, reusable conventions for asset organisation and audio state management across Unity and FMOD workflows.

EDUCATION

M.S. Music Technology, Georgia Tech (2015–2017) • **M.Tech Mechanical Engineering**, NIT Rourkela (2008–2012)
