

SIRISH SATYAVOLU

Audio Editor & AI Data Specialist — Voice Recording & Sound Processing

Austin, TX | 512-947-4428 | sirishsatyavolu@gmail.com | linkedin.com/in/sirishsatyavolu

PROFESSIONAL SUMMARY

Audio professional with 10+ years of hands-on experience in audio editing, mixing, and post-production across film, games, and interactive media. Proficient in Pro Tools, Logic Pro, and Audacity — with deep expertise in voice recording, noise reduction, signal processing, and sound design. Experienced collaborating with technical teams to define quality standards and annotate audio data. Trained ear for vocal quality, audio fidelity, and nuanced sound characteristics across a wide range of contexts.

CORE COMPETENCIES

- DAW Proficiency:** Pro Tools, Logic Pro, Audacity, Reaper, Studio One — editing, mixing, mastering
- Audio Post-Production:** Voice recording, ADR, noise reduction, equalization, compression, signal processing
- Sound Design:** SFX, foley, voice modulation, acoustic treatment, waveform analysis
- Data Annotation:** Audio labeling, voice clip annotation, quality assessment, curated dataset support
- Critical Listening:** Audio fidelity, tonal balance, noise floor, transient response, vocal clarity
- Collaboration:** Cross-functional teamwork with technical staff; clear documentation of audio conventions

PROFESSIONAL EXPERIENCE

- AI Speech Evaluation Developer** — *Confidential Client (Remote)* Nov 2025 – Present
 - Prototyping AI-assisted speech evaluation — processing and labeling spoken audio samples against reference standards to support training data quality.
 - Defining quality criteria for voice recordings: correct phonetic segmentation, audio clarity, and annotation consistency for downstream AI training.
- Speech Data & Phonetics Researcher** — *Confidential Client (Remote)* Feb 2026 – Present
 - Building a structured, IPA-mapped phonetic dataset — curating and annotating voice recordings for an API-ready speech and pronunciation platform.
 - Defining labeling conventions and quality criteria to ensure consistent, high-quality audio annotation across contributors.
- Sound Designer, Composer & Audio Director** — *Independent Film Projects* Jan 2019 – Present
 - Handled full audio post-production for four Telugu features — including ADR, sync sound, noise reduction, EQ, mixing, and mastering in Pro Tools and Logic Pro.
 - Directed voice talent recording sessions; edited and cleaned raw vocal tracks for emotion, intelligibility, and broadcast-quality output.
 - Applied waveform analysis, dynamic processing, and equalization to achieve consistent tonal balance across drama, comedy, and horror genres.
- Lead Audio Designer — Mobile Games** — *Nukebox, Giga Fun, Qila Games, Gear Inc.* Oct 2018 – Sep 2025
 - Shipped audio across 9+ titles reaching 200M+ players — including Spongebob: Krusty Cook-Off (29M+ downloads, Google Play Users' Choice Award 2020), Angry Birds Match 3, and M&M's Adventure.
 - Owned full audio pipelines — composition, SFX editing, voice clip processing, mixing, and middleware integration (FMOD, Unity) — maintaining high standards for audio fidelity and format compatibility.
 - Collaborated with technical and design teams on sound design tasks; documented clear, reusable audio conventions for asset organisation and quality assurance.
- Founder & Lead Audio Designer** — *Beat Kingdom, Original Rhythm IP* Aug 2025 – Present
 - Designing a music system driven by real-time audio analysis — applying close listening to pitch, timing, and intensity to evaluate and tune audio output quality using Logic Pro and Audacity.

EDUCATION

M.S. Music Technology, Georgia Tech (2015–2017) • M.Tech Mechanical Engineering, NIT Rourkela (2008–2012)
