▶ Angry Birds Match 3	Gear Inc.
▶ M&M's Adventure	Gear Inc.
▶ Ludo Hero	Qila Games
▶ Travel Match India	Giga Fun

PROFILE

Audio editor and post-production specialist with **10+ years** of hands-on work in Pro Tools, Logic Pro, Adobe Audition, FL Studio, and Cubase — across film, games, and interactive media. Deep expertise in **voice recording, dialogue cleanup, noise reduction, equalization, and signal processing**. Experienced editing and cleaning voice clips, collaborating with technical teams, and annotating audio data for AI training. Trained ear for vocal quality, fidelity, and subtle sound characteristics across a wide range of production contexts.

EXPERIENCE

AI Speech Evaluation Developer · Confidential Client Nov 2025 – Present

- ▶ Editing, cleaning, and labeling spoken audio samples using proprietary annotation tooling — processing voice clips against reference standards to support AI training data quality.
- ▶ Defining quality criteria for voice recordings: phonetic segmentation, audio clarity, noise floor, and annotation consistency for downstream AI training.

Speech Data & Phonetics Researcher · Confidential Client Feb 2026 – Present

- ▶ Building a structured, IPA-mapped phonetic dataset — curating and annotating voice recordings for an API-ready speech and pronunciation platform.
- ▶ Defining labeling conventions and quality criteria to ensure consistent, high-quality audio annotation across contributors.

Founder & Lead Audio Designer · Beat Kingdom Aug 2025 – Present

- ▶ Architecting a timing-based rhythm game in Unity + FMOD — designing beat-synchronised adaptive audio systems where musical energy evolves through BPM ramp progression and player streak, with all cues quantized to bar boundaries.

Sound Designer, Composer & Audio Director · Independent Film Projects Jan 2019 – Present

- ▶ 10+ years of film post-production across four Telugu features — handling full dialogue editing pipelines in Pro Tools, Logic Pro, and Adobe Audition: ADR integration, sync sound, voice modulation, noise reduction, and broadcast-quality mixing and mastering.
- ▶ Cleaned raw vocal recordings end-to-end — breath removal, de-essing, room tone repair, and dialogue leveling — applying waveform analysis, equalization, and signal processing to achieve consistent tonal balance across drama, comedy, and horror genres.
- ▶ Applied acoustic principles to diagnose and correct recording environment issues; directed voice talent for emotional clarity, intelligibility, and intentionality across scripted and spontaneous delivery styles.

Lead Audio Designer — Mobile Games · Nukebox · Giga Fun · Gear Inc. Oct 2018 – Sep 2025

- ▶ Owned full audio pipelines across 9+ titles — SFX editing, voice clip cleaning and processing, mixing, and middleware integration — maintaining strict standards for audio fidelity, format compatibility, and QA across simultaneous productions.
- ▶ Collaborated with technical teams to define sound design conventions and asset quality standards; work reached 100M+ downloads globally including Spongebob: Krusty Cook-Off (Google Play Users' Choice Award 2020).

LEADERSHIP & CRAFT

- ▶ Directed voice talent and ADR sessions across film and game productions — maintaining high bars for vocal clarity, emotion, and intentionality in both scripted and spontaneous delivery.
- ▶ Collaborated with technical teams to define audio quality standards, annotation conventions, and review criteria; consistently delivered across simultaneous projects with competing deadlines.

EDUCATION

M.S. Music Technology · Georgia Institute of Technology 2015 – 2017

M.Tech Mechanical Engineering · NIT Rourkela 2008 – 2012
